

Hopefully I have included all the known variations of 2023 vehicles to date, but if anyone knows of any that I have omitted please let me know. Please note with models that are carry forwards from previous years, I am not making notes of the differences between them and their original releases (too many to note), but am marking down if the casting has been modified from the initial release. If one of these still shows variations, this variation is purely down to the various 2023 production runs, not in comparison to older issues.

## **1-100**
